1. Specifications

Here is the list of features that I want to insert in my template. If we can do it, that's not bad ...

1. Bicolor modules title
2. 3 top modules with variable width
3. Horizontal drop down menu
4. Two types of module class suffix with rounded corners
5. Override module for rounded corners
6. Column width that adapts according to the right column and edit mode
7. Personalized radiobuttons in poll module

It already makes us a nice list and some work ahead !
